

Duchenne Video Project

Do you have a child with Duchenne who is at least 7 years old?

Or a male child without Duchenne who is between 7 to 16 years old?

Participate in a research study from your home!

A group of researchers is looking at a new approach for evaluating Duchenne, but they can't do it without your help!

In this study, parents will videotape their kids **at home** doing certain everyday tasks at the beginning of the study and again after 24 weeks using a **secure smartphone app**. Kids' faces will be blurred in the videos to protect their identities. Reading through the training materials and watching the training videos will take about 20 minutes, and each of the two video submissions and questionnaires will take about 40 minutes.

Parent/child pairs will receive a \$200 Amazon gift certificate for each of the 2 video and questionnaire submissions, for a total of \$400.

If you are interested in participating in this study, please contact Casimir study staff by email (**info@casimirtrials.com**) or phone (**800-881-5657**).
